

User Stories

1. Book an Appointment

User Story:

As a patient, I want to book an appointment with a doctor so that I can receive medical care at my preferred date and time.

Acceptance Criteria:

- The patient should be able to select a doctor, date, and time for the appointment.
 - The system should prevent double booking for the same doctor and time slot.
 - The system should confirm the booking and provide a reference number.
 - The system should notify the patient via email/SMS after successful booking.
-

2. View Available Appointments

User Story:

As a patient, I want to see available time slots for my preferred doctor so that I can choose a convenient appointment time.

Acceptance Criteria:

- The system should display available appointment slots based on the selected doctor and date.
 - The system should prevent displaying fully booked slots.
 - The patient should be able to filter by date and doctor.
-

3. View My Appointments

User Story:

As a patient, I want to view a list of my upcoming and past appointments so that I can keep track of my medical visits.

Acceptance Criteria:

- The system should display upcoming and past appointments.
 - Each appointment entry should include the doctor's name, date, time, and status.
 - Patients should be able to filter appointments by upcoming, past, and canceled.
-

4. Receive Appointment Confirmation

User Story:

As a patient, I want to receive a confirmation notification when I successfully book an appointment so that I am sure my booking is completed.

Acceptance Criteria:

- The system should generate a confirmation message after booking.
 - The confirmation should include the doctor's name, date, time, and location.
 - The system should send an email and/or SMS notification with appointment details.
-

5. Reschedule an Appointment

User Story:

As a patient, I want to reschedule an appointment so that I can change my booking to a more suitable time if needed.

Acceptance Criteria:

- The patient should be able to select a new date and time for an existing appointment.
 - The system should only allow rescheduling if done at least 48 hours in advance.
 - The system should update the appointment and notify the patient.
-

6. Cancel an Appointment

User Story:

As a patient, I want to cancel an appointment at least 48 hours in advance so that I can free up the slot if I am unable to attend.

Acceptance Criteria:

- The system should allow cancellation only if the appointment is more than 48 hours away.
 - The patient should receive a cancellation confirmation.
 - The canceled slot should become available for other patients.
-

7. Receive Cancellation Restrictions Warning

User Story:

As a patient, I want to be informed if I try to cancel an appointment less than 48 hours before the scheduled time so that I understand the policy restrictions.

Acceptance Criteria:

- If a patient attempts to cancel an appointment within 48 hours, they should receive an error message explaining the restriction.
 - The system should suggest contacting the clinic for emergencies.
-

8. Receive Appointment Reminders

User Story:

As a patient, I want to receive reminders before my appointment so that I don't forget to attend.

Acceptance Criteria:

- The system should send a reminder email/SMS 24 hours before the appointment.
 - The reminder should include appointment details and instructions.
-

9. Search for a Doctor

User Story:

As a patient, I want to search for doctors by specialty, name, or location so that I can find the right doctor for my needs.

Acceptance Criteria:

- The patient should be able to search doctors by name, specialty, and location.
 - The system should display matching doctors with availability.
-

10. Filter Appointments by Status

User Story:

As a patient, I want to filter my appointments by upcoming, past, and canceled so that I can quickly find relevant information.

Acceptance Criteria:

- Patients should be able to apply filters for upcoming, past, and canceled appointments.
 - The system should display relevant appointments based on the selected filter.
-

11. Receive Notifications for Changes

User Story:

As a patient, I want to receive a notification if my appointment is changed or canceled by the doctor so that I can adjust my plans accordingly.

Acceptance Criteria:

- If an appointment is modified by the doctor, the patient should receive an email/SMS notification.
 - If an appointment is canceled, the system should allow the patient to rebook.
-

12. Provide Feedback on an Appointment

User Story:

As a patient, I want to provide feedback after an appointment so that I can share my experience with the doctor and the service.

Acceptance Criteria:

- Patients should be able to rate and provide comments after an appointment.
 - The system should allow feedback only for completed appointments.
-

13. Access Telehealth Appointments (if applicable)

User Story:

As a patient, I want to join a virtual consultation if I have booked a telehealth appointment so that I can consult with my doctor remotely.

Acceptance Criteria:

- The system should provide a secure link to join the telehealth session.
 - The link should only be accessible at the appointment time.
-

14. Manage My Profile and Medical Information

User Story:

As a patient, I want to update my personal details and relevant medical history so that my doctor has accurate information about me.

Acceptance Criteria:

- The system should allow patients to edit their name, contact details, and medical history.
 - The system should restrict changes to sensitive medical data that require approval.
-

15. View Appointment Policies

User Story:

As a patient, I want to easily access the cancellation and rescheduling policies so that I understand the rules before making changes.

Acceptance Criteria:

- The system should have a dedicated section explaining policies.
 - The policy page should be accessible from the appointment booking and cancellation screens.
-

Here are user stories from the patient's perspective regarding prescriptions:

1. Receive a Prescription from My Doctor

User Story:

As a patient, I want to receive a prescription from my doctor so that I can get the necessary medication for my treatment.

Acceptance Criteria:

- The system should notify me when a doctor issues a prescription.
 - I should be able to view the prescription details, including medication name, dosage, and instructions.
 - I should be able to download or print the prescription if needed.
-

2. View My Prescriptions

User Story:

As a patient, I want to see a list of all my prescriptions so that I can track my medications and their status.

Acceptance Criteria:

- The system should display all my prescriptions, categorized as active, expired, or completed.
 - Each prescription should include the medication name, dosage, instructions, and issue date.
 - I should be able to filter prescriptions by status (e.g., active, expired).
-

3. Receive Notifications for New Prescriptions

User Story:

As a patient, I want to receive a notification when a doctor issues a new prescription so that I am aware of my treatment plan.

Acceptance Criteria:

- The system should send an email and/or SMS when a new prescription is issued.
 - The notification should include a link to view the prescription details.
-

4. Request a Prescription Renewal

User Story:

As a patient, I want to request a renewal for my prescription so that I can continue my treatment if needed.

Acceptance Criteria:

- I should be able to request a renewal for eligible prescriptions.
 - The system should notify me when the doctor approves or rejects my renewal request.
 - If rejected, the system should provide the reason and suggest a consultation if needed.
-

5. Know When My Prescription is About to Expire

User Story:

As a patient, I want to be notified when my prescription is about to expire so that I can request a renewal if needed.

Acceptance Criteria:

- The system should notify me via email/SMS when my prescription is nearing its expiration date.
 - The notification should be sent at least a few days before expiry.
-

6. Access My Prescription for Pharmacy Use

User Story:

As a patient, I want to share my prescription details with a pharmacy so that I can collect my medication easily.

Acceptance Criteria:

- I should be able to download or print my prescription.
 - If digital verification is enabled, I should receive a secure code to share with the pharmacy.
-

7. Receive Updates If My Prescription is Changed or Canceled

User Story:

As a patient, I want to receive a notification if my doctor updates or cancels my prescription so that I can take appropriate action.

Acceptance Criteria:

- The system should send a notification if my doctor updates my prescription.
 - If the prescription is canceled, I should see a reason and be advised on next steps.
-

Doctor User Stories

Here's your updated list of **user stories** with **acceptance criteria** for the **doctor's perspective** in your health appointment app:

Appointment Management

1. View Appointments

User Story:

As a doctor, I want to view my upcoming appointments so that I can prepare for patient consultations.

Acceptance Criteria:

- ✓ The doctor can log in and access the appointment dashboard.
 - ✓ The system displays a list of upcoming appointments sorted by date and time.
 - ✓ The appointment list includes patient name, date, time, and status.
 - ✓ Past appointments are either archived or marked as completed.
-

2. Filter Appointments

User Story:

As a doctor, I want to filter my appointments by date, patient name, or status so that I can quickly find relevant bookings.

Acceptance Criteria:

- ✓ The doctor can apply filters for date, patient name, or status (e.g., upcoming, completed, canceled).
 - ✓ The system updates the list dynamically based on the selected filters.
 - ✓ The doctor can reset filters to see the full appointment list.
-

3. View Patient Details

User Story:

As a doctor, I want to see the patient's details and medical history so that I can provide informed care during the consultation.

Acceptance Criteria:

- ✓ The doctor can click on an appointment to view patient details.

- ✓ The patient's contact information, age, and reason for the visit are displayed.
 - ✓ If authorized, the doctor can view past medical history.
-

4. Receive Notifications

User Story:

As a doctor, I want to receive notifications when a new appointment is booked or canceled so that I can manage my schedule effectively.

Acceptance Criteria:

- ✓ The doctor receives a real-time notification for new bookings and cancellations.
 - ✓ Notifications can be viewed in the app and optionally via email or SMS.
 - ✓ Cancellations are only allowed at least 48 hours before the appointment.
-

5. Mark Appointment as Completed

User Story:

As a doctor, I want to mark an appointment as completed so that I can keep track of which patients I have already seen.

Acceptance Criteria:

- ✓ The doctor can select an appointment and mark it as completed.
 - ✓ The system updates the appointment status and removes it from the upcoming list.
 - ✓ Completed appointments are stored for record-keeping.
-

6. Reschedule Appointments

User Story:

As a doctor, I want to request a rescheduling of an appointment if I have an emergency so that I can ensure patient care continues smoothly.

Acceptance Criteria:

- ✓ The doctor can request a reschedule by selecting a new available time slot.
 - ✓ The patient receives a notification about the reschedule request.
 - ✓ The patient must confirm the new time for the appointment to be updated.
-

7. Block Unavailable Slots

User Story:

As a doctor, I want to block specific time slots on my schedule so that patients cannot book during my unavailable hours.

Acceptance Criteria:

- ✓ The doctor can set unavailable time slots via the settings panel.
 - ✓ Patients cannot book appointments in blocked slots.
 - ✓ The system automatically updates availability based on blocked slots.
-

Patient Interaction

8. Send Messages to Patients

User Story:

As a doctor, I want to send messages to patients regarding their appointments so that I can communicate important details.

Acceptance Criteria:

- ✓ The doctor can send messages to patients via the app.
 - ✓ The system notifies the patient of new messages.
 - ✓ Messages are stored for future reference.
-

9. Request Additional Information

User Story:

As a doctor, I want to request additional medical information from a patient before their appointment so that I can prepare adequately.

Acceptance Criteria:

- ✓ The doctor can send a request for additional medical details.
 - ✓ The patient receives a notification and can provide the requested details.
 - ✓ The updated information is stored in the patient's profile for reference.
-

10. View Patient Medical History (if enabled)

User Story:

As a doctor, I want to access a patient's medical history (if they have granted permission) so that I can provide better care.

Acceptance Criteria:

- ✓ The system allows doctors to request access to a patient's medical history.
 - ✓ Patients must approve the request before the doctor can view past records.
 - ✓ Medical history data is displayed securely.
-

Administrative & Reporting

11. Generate Daily Schedule Reports

User Story:

As a doctor, I want to generate a report of my daily or weekly appointments so that I can plan my workload efficiently.

Acceptance Criteria:

- ✓ The doctor can generate a report for a selected date range.
 - ✓ The report includes patient names, appointment times, and statuses.
 - ✓ Reports can be exported as PDFs or CSV files.
-

12. Export Appointment Data

User Story:

As a doctor, I want to export my appointment data to a CSV or PDF format so that I can maintain personal records if needed.

Acceptance Criteria:

- ✓ The doctor can select a date range for data export.
 - ✓ The exported file contains patient names, appointment dates, and statuses.
 - ✓ The export function is available via the settings panel.
-

13. Track No-Shows & Cancellations

User Story:

As a doctor, I want to track the number of no-show patients or last-minute cancellations so that I can analyze trends in patient attendance.

Acceptance Criteria:

- ✓ The system logs and categorizes canceled and missed appointments.
- ✓ The doctor can view statistics on no-shows and cancellations.
- ✓ The doctor can filter reports to analyze trends over time.

14. Set Up Custom Appointment Durations

User Story:

As a doctor, I want to define the duration of each appointment so that I can allocate sufficient time per patient.

Acceptance Criteria:

- ✓ The doctor can set appointment durations (e.g., 15, 30, or 60 minutes).
 - ✓ The system automatically adjusts available slots based on the chosen duration.
 - ✓ Patients can only book based on the predefined time slots.
-

Here are some **user stories** related to doctors issuing **prescriptions** for patients, along with **acceptance criteria**:

Prescription Management

15. Issue a Prescription

User Story:

As a doctor, I want to issue a prescription for a patient so that they can obtain the necessary medication.

Acceptance Criteria:

- ✓ The doctor can access a patient's appointment details and issue a prescription.
 - ✓ The system allows the doctor to enter the medication name, dosage, frequency, and duration.
 - ✓ The prescription is saved to the patient's record.
 - ✓ The patient receives a notification about the new prescription.
-

16. View and Manage Prescriptions

User Story:

As a doctor, I want to view and manage past prescriptions so that I can track a patient's medication history.

Acceptance Criteria:

- ✓ The doctor can view a list of past prescriptions for a selected patient.
 - ✓ The prescription history includes medication names, dosages, and issue dates.
 - ✓ The doctor can update or discontinue a prescription if necessary.
-

17. Send Prescriptions to Pharmacies

User Story:

As a doctor, I want to send prescriptions directly to pharmacies so that patients can conveniently collect their medication.

Acceptance Criteria:

- ✓ The doctor can select a preferred pharmacy from a list.
 - ✓ The prescription is securely transmitted to the chosen pharmacy.
 - ✓ The patient is notified when the prescription is ready for pickup.
-

18. Print or Download Prescription

User Story:

As a doctor, I want to print or download a prescription so that I can provide a physical copy to the patient.

Acceptance Criteria:

- ✓ The doctor can generate a printable version of the prescription.
 - ✓ The document includes the doctor's details, patient name, medication, dosage, and instructions.
 - ✓ The prescription can be downloaded as a PDF.
-

19. Verify Medication Interactions

User Story:

As a doctor, I want to be alerted about potential drug interactions when issuing a prescription so that I can ensure patient safety.

Acceptance Criteria:

- ✓ The system checks for potential interactions with the patient's existing medications.
 - ✓ If an interaction is detected, the doctor receives a warning message.
 - ✓ The doctor can override the warning with a justification if necessary.
-

20. Set Prescription Renewal Rules

User Story:

As a doctor, I want to set prescription renewal conditions so that patients can request refills when appropriate.

Acceptance Criteria:

- ✓ The doctor can specify whether a prescription is renewable and how many refills are allowed.
 - ✓ Patients can request a renewal if refills are available.
 - ✓ The doctor receives a notification to approve or reject the renewal request.
-

21. Attach Notes to Prescriptions

User Story:

As a doctor, I want to attach special instructions or notes to a prescription so that patients understand how to take their medication properly.

Acceptance Criteria:

- ✓ The doctor can add additional notes when issuing a prescription.
 - ✓ The notes are displayed alongside the prescription in the patient's portal.
 - ✓ The patient receives a notification about any special instructions.
-

This should cover key prescription-related features for your health appointment app. Let me know if you'd like any modifications! ☐

Administrator User Stories

Here's a set of user stories for the **Administrator** role in your health appointment app, along with acceptance criteria:

1. Manage Users

As an administrator, I want to create, update, and deactivate user accounts so that I can manage access to the system.

Acceptance Criteria:

- ✓ The administrator can create new user accounts for doctors and patients.
 - ✓ The administrator can update user details (e.g., name, email, role).
 - ✓ The administrator can deactivate/reactivate accounts.
 - ✓ The system prevents duplicate email addresses for users.
 - ✓ The administrator receives a confirmation message after successful changes.
-

2. View All Appointments

As an administrator, I want to view all scheduled appointments so that I can monitor the system's usage and assist users if needed.

Acceptance Criteria:

- ✓ The administrator can see a list of all upcoming and past appointments.
 - ✓ The system displays appointment details, including date, time, patient, doctor, and status (scheduled/cancelled/completed).
 - ✓ The administrator can filter appointments by date, doctor, or patient.
-

3. Cancel Appointments on Behalf of Users

As an administrator, I want to cancel appointments on behalf of doctors or patients so that I can assist them when needed.

Acceptance Criteria:

- ✓ The administrator can search for a patient or doctor and cancel an appointment.
 - ✓ The system prevents cancellations within 48 hours of the appointment time.
 - ✓ A cancellation confirmation is shown before finalizing the action.
 - ✓ The affected patient and doctor receive a cancellation notification.
-

4. Override Cancellation Restrictions

As an administrator, I want the ability to override the 48-hour cancellation restriction in special cases so that I can handle urgent situations.

Acceptance Criteria:

- ✓ The administrator can cancel an appointment within 48 hours with a justification note.
 - ✓ The system logs the override action and the justification.
 - ✓ The affected patient and doctor receive a notification about the cancellation.
-

5. Manage Doctor Schedules

As an administrator, I want to set and update doctors' availability so that the system reflects their working hours and availability.

Acceptance Criteria:

- ✓ The administrator can set working hours for doctors (e.g., 9 AM - 5 PM, Monday to Friday).
 - ✓ The administrator can update or block off certain dates (e.g., vacation, sick leave).
 - ✓ The system prevents appointment bookings outside a doctor's available hours.
 - ✓ Patients are notified if their appointment needs to be rescheduled due to schedule changes.
-

6. Generate Reports

As an administrator, I want to generate reports on appointment statistics so that I can analyze system usage and trends.

Acceptance Criteria:

- ✓ The administrator can generate reports showing total appointments booked, cancelled, and completed.
 - ✓ Reports can be filtered by date range, doctor, and patient.
 - ✓ The system provides an export option for reports (CSV or PDF).
-

7. View and Manage System Logs

As an administrator, I want to view system activity logs so that I can monitor actions taken by users.

Acceptance Criteria:

- ✓ The administrator can view logs of key actions (e.g., appointment bookings, cancellations, user account changes).
 - ✓ Logs include timestamps, user IDs, and action details.
 - ✓ Logs are searchable by date, user, and action type.
-

8. Send System-Wide Notifications

As an administrator, I want to send announcements and updates to all users so that they are informed about important changes.

Acceptance Criteria:

- ✓ The administrator can send notifications to all users or specific roles (doctors, patients).
- ✓ Notifications appear in the app and can be sent via email if configured.
- ✓ Users can view past notifications in their dashboard.
